

HAND CARE FOR FOOD HANDLERS

Maintain fingernails short and clean at all times. When washing hands, don't forget to clean around and under fingernails.

Food handlers are not permitted to have long fingernails, false fingernails, or painted fingernails.

Non-infected wounds must be cleaned, bandaged and covered with a glove at all times. Ensure gloves are being changed when required.

The only hand jewelry permitted to be worn by a food handler is a plain band ring (no diamonds).
