

Application for Private Water System Evaluation

Water system evaluations are often requested by a homeowner for lender purposes, water sampling, or illness. Please note that the final report may not meet requirements for some lending agencies, e.g. FHA, VA, USDA, etc. The report will not be modified to accommodate another agencies requirements or requests.

An evaluation consists of a review of agency records, an onsite evaluation of the existing system, and a standard water sample. The results will indicate if the water is contaminated with Coliform bacteria or E-coil bacteria. Additional tests are available for an additional fee. See page 2 for additional sampling options.

Our agency provides a report **after** all services and lab results are complete. Reports are generally completed a week after the evaluation. An evaluation will be scheduled after the application and fee are received.

Please note the following:

- Do not chlorinate your well close to the time of the inspection because the water cannot be tested if a high presence of chlorine is present.
- Re-scheduling missed appointments will incur a charge. If the chlorine level is high and the sample is not able to be taken, this will be treated as a missed appointment and will incur a charge.
- The owner, someone the owner knows and trusts over the age of 18, or the real estate agent must be present for access to the property.

An equal opportunity provider of employment and services.

Application for Private Water System Evaluation

Reason for Request:

Sale/Refinance License ODA/ODH, Permit
 Foster/Daycare Voluntary
 Nuisance/Illness Custom/Other _____

Location to be evaluated:
